- » Eagle offers you a complete line of egg processing and washing chemistry. Chlorinated and non-chlorinated, powder or liquid; we have the premier cleaners, sanitizers and defoamers to clean your eggs to a bright and soil free surface.
- » Eagle products contain builders and wetting agents that are excellent at keeping your equipment clean and your eggs dry. We also have a line of descaling acids to maintain your equipment as well as detergents specifically designed to keep your processing area clean.

- » Floor cleaning is a universal need, and Lynx has a wide array of products available to clean all types of floors in any facility. We provide a complete selection of high or low foaming detergents, along with custom-manufactured solutions for your specific requirements.

## Innovation

### Custom Solutions

Eagle offers more than 2700 different liquid, powder and process chemicals to meet a multitude of applications. Each product is designed to maximize cleaning and be environmentally friendly.

When special needs require a custom formulation, our experience and state-of-the-art laboratory is available to create and quickly deliver a solution to solve your industry-specific problem.

### Quality Control

Eagle manufactures and delivers a diverse line of cleaning products. With no "middle man," your Eagle representative is your partner in the design and planning of an efficient cleaning regimen.

Each batch is tested and documented to meet strict quality control standards. This ensures that your cleaning operations will always yield the same results—no surprises or need to repeat an operation.

Our state-of-the-art laboratory monitors the quality control of all Eagle products and maintains vigilance in product improvement, environmental regulation and product development.
